## ABOUT ME

I enjoy developing, often working independently due to my preference for self-learning. However, I am open to collaboration where I can contribute and grow both as a team member and an individual. I make mistakes, but I learn from them. I believe that a project cannot be completed without the discipline and hard work of the developer.

## SKILLS

### Technologies Familiar With

## EDUCATION

DIP: ICT in Application Development  
CPUT ( Diploma )  
2021 - 2023

HC: Info & Com Technology  
College of Cape Town ( Higher Certificate )  
2020 - 2021

High School  
The Oracle Academy ( Bachelor's pass )  
2013 - 2018

## KEY PROJECTS

### Shaded Eyewear

Developed a web application for purchasing sunglasses using Yoco's API with the MVEN stack (MongoDB, Vue.js, Express.js, Node.js), featuring an admin management panel that is not accessible to customers, and utilizing JWT tokens with cookies for secure authentication.

### On The Go Rentals

Created a full stack car rental application for a CPUT capstone group project using Spring Boot API, Java, Vue.js, and MySQL.

## EXPERIENCE

### Developer and IT Support

**WLV Solutions** – Remote (Stellenbosch)  
March 2024 – January 2025

- Maintained and updated WordPress sites
- Developed web applications, including a service desk and client-specific solutions.
- Provided IT support and assisted with marketing
- Continuously learned new technologies, such as the quasar framework for web and mobile applications.
